

Good Day,

We have been XM Satellite Radio subscribers for over 2 years now. We love the service. It offers us a broad variety of programs, tells us what we're listening to, and gives us choices that are not available on AM/FM stations.

I believe that government regulations should be established when necessary to serve or protect our citizens. I do not understand how limiting the content that XM offers meets either criteria. First, I don't need any protection from the radio. I can change the channel or turn it off whenever I want. Second, and more importantly, it is the opposite of serving me when you regulate and limit the stations available through a service for which I pay.

I respectfully request that you reject NAB's petition 04-160 and allow XM Satellite Radio to offer the broad variety of programming and services that its paying customers request and deserve.

Thank you.

Karen Davidson
